

## IT REVOLUTION ANNOUNCES CALL FOR PAPERS FOR DEVOPS ENTERPRISE SUMMIT LONDON 2016

*Enterprise IT leaders and software delivery experts are encouraged to submit topics that focus on organizational design, modern technology adoption, and security and compliance*

PORTLAND, Ore., March 23, 2016 – IT Revolution (<http://itrevolution.com>), the industry leader for advancing DevOps, today announced its call for papers for DevOps Enterprise Summit (DOES) London, the premier industry conference for the leaders of large, complex organizations implementing DevOps in the UK and Continental Europe (<http://devopsenterprise.io/>). The call for paper submissions will close on April 18, 2016 (<http://bit.ly/LDNCFP>), and the conference is scheduled for June 30–July 1. Abstracts should address the conference theme of “Leading Change,” and its sub-topics of organizational design in the enterprise, the functions of people, modern processes and technology adoption, and addressing security and compliance.

Early Bird registration for DOES London 2016 will open soon and is highly encouraged, as the popular U.S. event sold out the past two years. In addition, the DevOps Enterprise Summit 2016 U.S. conference, set for Nov. 7–9, has opened Blind Bird registration. For more information, visit: (<http://bit.ly/doessfo16reg>).

“The goal of the DevOps Enterprise Summit is to provide enterprise IT leadership with the tools and practices they need to develop and deploy software faster, in order to win in the marketplace,” said Gene Kim, founder of IT Revolution and co-author of “The Phoenix Project: A Novel About IT, DevOps, and Helping Your Business Win.” “This year we are looking to identify and amplify the evolving technical and architectural IT practices, as well as the methods needed to lead widespread change efforts in large organizations.”

Based on feedback from past DOES attendees, enterprise leaders often want to know how to replicate the successful DevOps practices other businesses demonstrate. DOES organizers are excited to present attendees in London with experience reports by leaders who are pioneering these IT transformation practices in large and complex organizations across a wide range of industries – from retail and financial services to telecom and manufacturing. Sessions will feature industry luminaries, as well as speakers from global companies, who will share learnings from their enterprise DevOps initiatives.

### About IT Revolution

IT Revolution assembles technology leaders and practitioners through publishing, events, and research. Our goal is to elevate the state of technology work, quantify the economic and human costs associated with suboptimal IT performance, and to improve the lives of one million IT professionals by 2017.
